

GUEST GUIDE

Start Here

Thank you for your purchase. Follow three quick steps to extract, start and build your digital guest guide on your computer.

READ FIRST

This one-page quick start gets you running in minutes. For full setup details, open [installation-guide.pdf](#). For the complete builder walkthrough, open [user-guide.pdf](#).

Three steps to get started

1	Extract Extract the entire ZIP to a folder on your computer. Keep all files together — do not move only <code>index.html</code> .
2	Start Windows: double-click <code>start.bat</code> macOS: double-click Start Guest Guide Builder.command Linux: run <code>./start.sh</code> (chmod +x first if needed) Your browser opens the builder automatically. Keep the terminal window open while you work.
3	Build your guide 1. Follow the workflow timeline: Template, Settings, Plan, Edit. 2. Apply a starter template or continue with a blank project. 3. Add sections in Plan and fill in content in Edit. 4. Set your logo and colours in Settings > Appearance. 5. Export a guest ZIP from Export ZIP in the timeline or header.

PHONE TABLET

After starting on your computer, scan the QR code in the preview panel of the builder to edit from your phone on the same Wi-Fi. This QR is for you — not the guest QR you create later in the QR code workflow step.

NOT INCLUDED

This purchase is the Guest Guide Builder only. It does not include Finance Tracker or the Complete Host Kit bundle.
